

VOLT

The HKD Volt is the “airless” low energy workhorse in our tower gun line up. The Volt incorporates our SV14 snowgun design and Rotary Valve Technology allowing 5 water flows.

The Volt is powered by a 7.5 HP (5 kW) compressor. The Volt is designed to cover your most critical, early opening terrain where hill air is not an option.

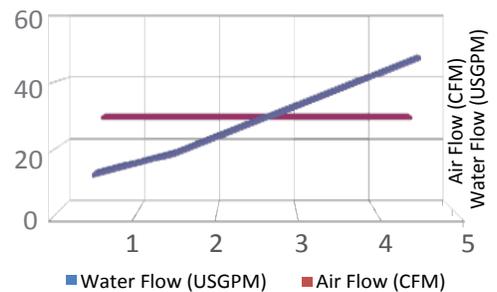

The Volt can be tower mounted or operated on a carriage or sled.
