

PRODUCT SPECIFICATIONS

Height	10, 20, 30 ft 3, 6, 9 m
Weight (w/o bracket)	550, 580, 620 lb 250, 236, 281 kgs
Wet Bulb Start-Up	28 °F -2 °C
Water Flow	14 - 80 gpm 53 - 303 lpm
Minimum Water Pressure	200 psi 13 bar
Compressor	7.5 HP 5.6 kW
Power Requirement	11.7 amps at 480 volt 7.5 amps at 600 volt
Throw	30 - 125 ft 9 - 38 m
Water Flow Stages	single flow, 4, 5, 8 stages

The HKD Volt is the "airless" low energy workhorse in our tower gun line up. The Volt is available in standard or narrow throw to get the snow exactly where you need it. The Volt utilizes our Rotary Valve Technology to allow 4, 5 or 8 water flows or single flow.

The Volt is powered by a 7.5 HP (5 kW) compressor. The Volt is designed to cover your most critical, early opening terrain where hill air is not an option.

The Volt is compatible with the SV14 or Phazer head. The Volt can be tower mounted or operated on a carriage or sled.
